"We have interpreted the world, in various ways; the point, however, is to change it."

SUMMARY

Multidisciplinary Project Manager and Forward Deployed Engineer working at the intersection of technology, sociology, and ontology. Three years of experience shipping end-to-end products and systems, distributed and internal, across directive and supporting roles. Current focus: simulations, LLM working memory, and small language models.

EXPERIENCE

Project Manager, Product and Systems Consultant

Roda Ventures LLC

September 2022 - Present

Clients: Meta, Amazon, Hoka

- Partnered with clients, creative teams, and developers to drive execution, maintain alignment, and keep deliverables on track.
- Supported quality assurance testing projects across the Microsoft tool suite and in-house developed AI systems.
- Delivered creative and brand projects, coordinating timelines, feedback cycles, and cross-functional communication.
- Supported new business development through client pitches and onboarding.

Co-Founder and Systems Architect

NOEM (Series A)

January 2026 - Present

- Designed, built, and shipped Noem - Context, a native iOS and iPadOS app on the App Store, scaling to 4,921 active customers, 567 paid subscriptions, and **\$2,966 MRR**, with **1,500 new customers in 28 days**.
- Architected context-aware AI infrastructure that translates raw real-world signals into structured machine intelligence, enabling more accurate and adaptive inference pipelines.
- Applied machine learning and statistical modeling to improve inference quality and system adaptability.
- Drove product development from prototyping AI-driven workflows through architecture decisions, cutting iteration cycles with tight feedback loops.
- Built and maintained ML pipelines covering data ingestion, feature engineering, model training, FastAPI deployment, and MLflow monitoring, cutting model refresh cycles from 2 weeks to 3 days.
- Focus areas: RAG and LLM pipelines, agentic frameworks, product strategy, MLOps, LangChain, 0-to-1 product, fundraising.

Founder and Blockchain Systems Architect

ARC-Hoops (Seed)

October 2024 - Present

- Building the social market for basketball culture: USDC settlement on Base, a Uniswap V4 AMM with hooks, and protocol-owned liquidity that compounds under every trade.
- Presented model performance reports and product recommendations directly to the C-suite on a quarterly basis.
- Developed Solidity smart contracts with Hardhat, covering deployment, verification, and hook-aware pool lifecycle management.
- Ran spec, implementation, and verification phases across the full transaction flow: mint, quote, settle, holdings.
- Focus areas: MLOps, PyTorch, DeFi, onchain contracts, AMMs, and SocialFi.

EDUCATION

Advanced Certificate, User Experience and Data Science

Pratt Institute, School of Information, Brooklyn, NY

January 2024 - January 2026

Bachelor of Arts, Critical and Visual Studies; Entrepreneurship and Entrepreneurial Studies

Pratt Institute, Brooklyn, NY

September 2022 - May 2025

SKILLS

Languages: Python, C++, JavaScript, TypeScript, Swift, HTML, CSS

Frameworks and Libraries: React, FastAPI, PyTorch, LangChain, LangGraph

AI and ML: LLMs, RAG, Agentic Frameworks, Knowledge and Context Graphs, Model Fine-Tuning, Computer Vision, MLOps, MLflow

Data and Infrastructure: AWS, PostgreSQL, Neo4j, Redis, Real-Time Data Pipelines, Distributed Systems, A/B Testing

Blockchain: Solidity, Hardhat, Uniswap V4, Base, USDC, Smart Contract Deployment, DeFi, AMMs

Design and Product: Figma, Adobe Creative Cloud, TouchDesigner, iOS and iPadOS Development, App Store Release, Design Systems

Project Management: Microsoft Tool Suite, Quality Assurance Testing, Cross-Functional Coordination, Product Strategy, Fundraising
